INTRODUCTION

Tivannah Innovations Youth Club (TIMYC) is a registered, non-profit, youth-led organization based in Choma District, Southern Province, Zambia. The organization was founded in 2021 by a group of visionary and determined young people who were passionate about creating positive change in their community through creativity, innovation, leadership, and youth empowerment.

TIMYC officially began with 13 committed members, united by a common desire to address the growing social and economic challenges affecting many young people in Choma and surrounding communities. These challenges included unemployment, substance abuse, early school dropout, lack of opportunities, limited access to skills training, and absence of platforms where young people could express their talents.

Since its formation, TIMYC has steadily grown into a respected youth organization known for using media, arts, education, community service, and environmental action as tools for transformation. Through determination, volunteerism, and teamwork, the organization has become a beacon of hope for many young people.

BACKGROUND AND FOUNDING STORY

Tivannah Innovations Youth Club was established in 2021 during a period when many youths were facing uncertainty and social challenges. Rather than remain idle, a small group of motivated youths came together with a dream to make a difference.

The organization started with only 13 members, but with a powerful vision. The first major project undertaken by the group was the production of a movie titled Blind Girl, which became a symbol of what young people could achieve when given a platform.

The success of this first production inspired members to expand their activities and continue creating meaningful content that educates, entertains, and transforms society. Over time, TIMYC attracted more members, collaborators, and supporters who believed in the mission of youth empowerment through innovation.

From humble beginnings, the organization has grown into a vibrant movement that continues to impact communities through films, outreach programs, environmental projects, and youth development initiatives.
